FOUNT INTERNATIONAL
Manufacture Medical Instruments

Introduction

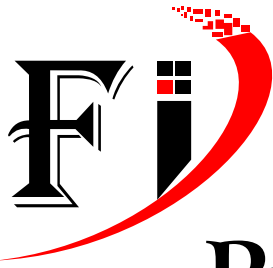

Fount International is the leading manufacturer of Dental Instruments . Our products are being used by health care professionals in all over the world. Fount International has an exclusive reach within the medical products manufacturing industry to deliver its customers with exactly what they require.

Whether it is a minor adjustment to the design of an instrument or personalized hospital or clinic labeling on instruments. **Fount International** commits to deliver professional quality instruments to its customers along with top of the line customer service. It is with our extensive range in products and our ability to manufacture precise customized instruments that Fount International is the number one choice for doctors all over the world.

We try every day to improve in our operations so that our customers can get the best experience. By using only the best raw material and top of the industry manufacturing processes, **Fount International** is able to come up with premium quality instruments.

To equip hospitals and health care professionals with top quality products so that they can perform to their fullest. Our vision is to work together with doctors to save millions of lives all around the world.

To continually develop our technical expertise on the basis of technology, innovations, customer feedback and quality workforce. To form strategic joint ventures within the industry to better fulfill the needs of our customers.

Process of Instruments

Steel the quality of steel is very important in the production of quality instruments. The best you select the best you produce. In order to ensure the finest of quality steel, we have imported or best quality local steel as required by valued customers.

Forging is a process of cutting shaped raw instruments with the help of dyes and hammers. Here, the skilled hands give life to the metal and give it the rudimentary shape that will go through series of complicated processes.

Forging Inspection at this stage, forged tools are checked to ensure no piece contains any cracks or is reshaped beyond acceptable limits. Checking the quality of raw instruments for: -
a. Shape fault b. Broken

Machining in this process forging is cut or shaped by machines i.e. cutting sharp edges and raw material in the shape. Here instruments are given their shape through grinding and hammers. For this purpose, extremely skilled labor is required and this process is carried out by instrument specialists only.

Milling drilling of holes in the instruments where required for screws. Different kinds of screwing machines are used and instruments are made pairs here. Instruments with even the slightest difference in whole positions will suffer otherwise.

Inspection at this stage, all the instruments is inspected not only for machining and milling, but for every process they've been through. It's the stage where only best instruments are selected and instruments with tiny holes and manufacturing faults are again sorted out.

Filling at this stage the steel is not too hard so filling is used to shape the instruments in the exact shape they are required to be. The workers match the shape exactly with the samples provided at this stage. So the instruments get most of their shapes at this stage.

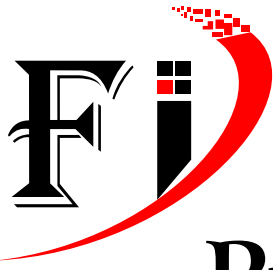

Filling Inspection after filling the inspection is made and measurements and shapes are checked according to samples.

Binding and Temper at this step the instruments are bound in groups of 12 pieces. Then they put them in temper machine, which is filled with a particular material. Here instruments are tempered and its ensured that every instrument get equal heat and treatment so a consistent quality would achieve.

Snuffing Fitting for scissors and forceps they are in two pieces so they are joined in this process with screw. Forceps (Tweezers) are joined before and their joint is leveled with a machine by burning the raw material on the joint. At the same stage, instruments are filled to eliminate welding suspensions.

Plant or Heat Treatment in this process the instruments are dipped in a material by hanging for five minutes to harden the material.

Polishing instruments is polished at this stage. Till this point at manufacturing stage, all the necessary shaping is done. Polishing makes every millimeter of instrument clear and any instrument with hidden defects are revealed could be sorted out.

FOUNT INTERNATIONAL
Manufacture Medical Instruments

Process of Instruments

Fount International Inspection 2% of each lot of instruments is checked by executives and then goes the further processing. In inspection they see each and every part and defective parts are marked with red marker and if rejected send to polishing again.

Ultrasonic cleaning in this process the instruments are dipped in two materials for cleaning the polish raw thing on it. One min. for first material and then for half min. for other material. Ultrasonic cleaning cleans any polishing material stuck and leaves the instrument crystal clear.

Lubrication all the instruments involving screws are lubricated at this step. Lubricating the instruments moveable portions facilitates the instrument movement.

Tuck checking In this process workers check the cuts and all other things just by viewing the instruments individually.

Etching putting each instrument on stamp pad and burning process to put stamp on each instrument. This stamping procedure is done through electronic etching machines that make the stamp reliable and even sustainable under high boiling temperatures when instruments are sterilized.

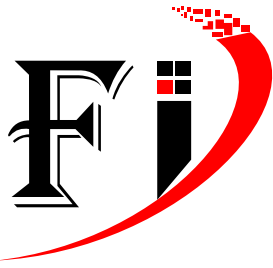

Cleaning and Checking instruments are cleaned and checked again one by one. Again it's the checking for operation, measurements, polish and usability.

Fount International Inspection 4 % of the instruments is inspection by SSE Directors. Samples for inspection are taken randomly and are observed to every bit of detail. Even the slightest difference from acceptable standards could result in rejection of whole lot.

Packing in boxes each contains 100 pieces. 10 Boxes in an each Carton. Here instruments are packed with respect to sizes and types. Instruments boxes are properly labeled and stored in proper storing environment.

Labeling is put in this process.

Storage by lot and order number

matrix band retainer ivory 8n.
made of stainless steel

Matrix retainer didner 8P
FI-D-28-117
matrix band retainer ivory 8p.
made of stainless steel

Articulators

Plasterless articulator galetti (white)

FI-D-29-101

high tech plasterless articulator galetti with adjustable screws at rears & front. solidly constructed of metal alloy casting. all anatomical movements possible

Vibratory polished articulator galetti

FI-D-29-102

galetti articulator is solidly constructed of metal alloy casting. easy to use, allowing quick fixation of model. immediate adjustment of the occlusal & corrects imulation of central relation. all anatomical movements possible. vibratory polished

Anatomical articulator (asa)

FI-D-29-103

anatomical articulator with bearing rod & incisive pin, 4 mounting plates & supporting back-pin for 45° view, opening 125°, intercondylar distance 110 mm - solidly constructed of metal alloy casting

Universal articulator

FI-D-29-104

anatomical articulator, made of aluminum pressofusion of only

Gnatus pro jp30 articulator

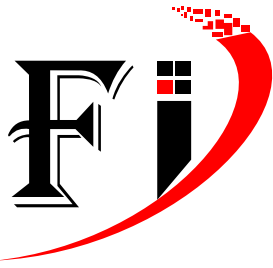

FI-D-29-105

the gnatus pro jp30 articulator offers the best performance with an excellent degree of accuracy. its functionality makes easier

Anatomical articulator

FI-D-29-106

Articulators

KEYSTONE BLACK ARTICULATOR WIRED

FI-D-29-107

keystone deluxe universal type-a articulator. interchangeable, incisal pin included, lateral excursions.

KEYSTONE DELUXE MAGNET ARTICULATOR

FI-D-29-108

keystone deluxe magnetic denture articulator with plates, interchangeable, incisal pin included. magnetic split casting ensures easy & exact setting, lateral excursions

PROFESSIONAL OCCULUSOR ARTICULATOR

FI-D-29-109

professional occlusor, vibratory polished articulator - aluminum, brass, stainless steel

Magicart-1 Articulator

FI-D-29-110

lightweight, high-quality magic art articulator securely holds quadrant models, conserve materials & time! quickly & easily mount pre-cast dental models with the high quality. with

FULL DENTURE ARTICULATOR (ROUND)

FI-D-29-111

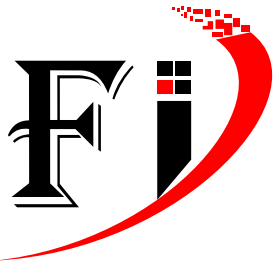

full denture chrome plated articulator (3 slot round)

MODEL 'M' HI TOP STEPHAN ARTICULATOR

FI-D-29-112

full denture chromium plated articulator. provides additional vertical dimension for acceptance of higher models. 49 wide at the joint & has a vertical

Articulators

Chromium plated plain round
FI-D-29-113

Nickle Chromium Plated Plain Round
Articulator

Universal articulator (yellow)
FI-D-29-114

universal articulator opening
125° with 4 mounting plates -
condylar inclination fixed at 30°,
intercondylar distance at 110mm,
bennet angle fixed at 7°, distance
between mounting plates 85 mm.
solidly constructed of metal
alloy casting. available in assorted
colors

Foster denture articulator
FI-D-29-115

this articulator is equipped with
an adjustable anterior pin stop &
posterior screw stop, and
constructed of a slightly heavier
gauge brass giving the
articulator a more solid feel.

Fork chrome plated articulator

FI-D-29-116

nickle chromium plated

Hinge articulator full arch

FI-D-29-117

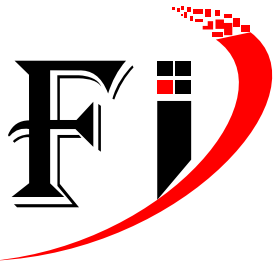

an economical & simple chromium
plated hinge articulator for
Mounting full arch cases low

Quadrant / crowned bridge
Articulator

FI-D-29-118

brass hinge crowned bridge
articulator for mounting
quadrant cases. crown & bridge

Artucykators

Universal articulator (blue)
FI-D-29-119

universal articulator opening 125° with 4 mounting plates - condylar inlination fixed at 30°, intercondylar distance at 110mm, bennet angle fixed at 7°, distance between mounting plates 85 mm. solidly constructed of metal alloy casting.

Foster / apex # 2 articulator
FI-D-29-120

foster / apex # 2 articulator, the width at the joint is 1-3/4" with a vertical parallel height of 2-1/8". the small size of this articulator allows the versatility to use for full or partial work. the finish is bright chrome. high back

Mortimer-i oculader articulator
FI-D-29-121

plainline ball bearing mortimer-i oculader articulator. all filled with high carbon steel balls for smooth setting & articulation of denture

Mortimer-ii oculader articulator
FI-D-29-122

plainline ball bearing mortimer-ii oculader articulator. all filled with high carbon steel balls. semi-adjustable articulator

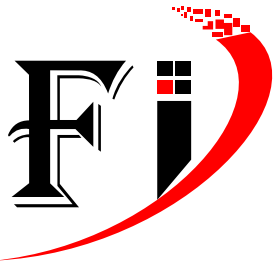

Occlusor, wire articulator
FI-D-29-123

occlusor, wire articulator - stainless steel & aluminum

Asa articulator 5002
FI-D-29-124

asa articulator with lateral moment. made of aluminum die casting with 2 mounting plates.

Model \"A\" Crescent Stephan Articulator

FI-D-29-125

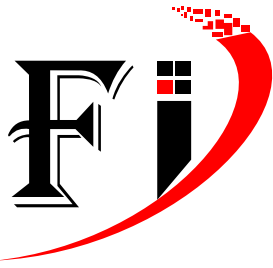

CRESCENT STEPHAN MODEL \"A\" ARTICULATOR IS USED FOR PARTIALS, CENTER SPRING WITH ADJUSTABLE TENSION, SMOOTH BRASS CASTINGS WITH NICKEL PLATING, CENTER BAR IN BOTH UPPER & LOWER BOW FOR MAXIMUM PLASTER RETENTION & STRENGTH. WIDTH AT THE JOINT OF 29, & VERTICAL SPAN WHEN BOWS ARE PARALLEL OF 2 1/8\". REPRODUCE ALL ANATOMICAL MOVEMENTS. UPPER AND LOWER SECTIONS MAY BE SEPARATED OR ASSEMBLED QUICKLY. OPEN CONSTRUCTION PROVIDES FREE ACCESS TO LINGUAL SURFACES. ANATOMICAL IN EVERY RESPECT

Bite Fork / Occlusal Alignment Plane

FI-D-29-126

BITE FORK IS A RELIABLE INSTRUMENT FOR CHECKING THE CORRECT POSITION OF THE MASTICATORY PLANE, ACHIEVING PARALLELISM OF THE OCCLUSAL PLANE WITH THE CAMPER'S LINE & THE BIPUPILLARY LINE IS FUNDAMENTAL TO THE CONSTRUCTION OF DENTURES
